EDUCATION

Nitte Meenakshi Institute Of Technology

Bachelor of Engineering in Information Science (CGPA: 9.52)

Bangalore, Karnataka

2023 – 2027

Gyanasthali High School

CBSE – Higher Secondary (12th)

Patna, Bihar

2021 – 2023

EXPERIENCE

PhytoMaps

Full Stack Intern

Roermond, Limburg, Netherlands (Remote)

Sept 2025 – Dec 2025

- Built a scalable geospatial analytics platform for golf course management using React, TypeScript, Mapbox GL JS, and PostgreSQL with **Supabase** as the backend.
- Implemented a secure multi-tenant system with an admin dashboard and isolated client workspaces using PostgreSQL RLS and JWT-based access control.
- Developed a high-volume ingestion pipeline handling **10,000+ map tiles per session** with secure multi-part uploads up to **5GB** and improved tile delivery using Cloudflare R2, caching headers and signed URLs.

PROJECTS

GhosTrade | *Python, IsolationForest, OHLCV, Z-score, ML* | [Try it Out](#)

- Architected the backend and led ML research; built a **real-time market integrity engine** detecting anomalous stock behavior via an unsupervised ML pipeline on raw OHLCV data.
- Engineered **four proprietary microstructure signals** (VAI, VBS, PVD, LIP) — each Z-score normalized against the ticker's own rolling historical baseline.
- Integrated an **IsolationForest**-based anomaly detection pipeline on a 4-dimensional Z-score feature matrix to flag statistically manufactured market moves.

Faculty Development Portal | *Supabase, PostgreSQL, TypeScript, React* | [Try it Out](#)

- Engineered backend for a platform managing faculty professional development; designed a relational **PostgreSQL** schema supporting Faculty, HoD, and Admin roles.
- Implemented role-based auth via **Supabase Auth** and integrated **real-time updates** using Supabase Realtime with full TypeScript type-safety.

NuFlash | *Next.js, React, TypeScript, OpenAI API, Supabase, TailwindCSS* | [Github](#)

- Contributed to backend logic for an **AI-powered news curation pipeline** using **OpenAI API** to select and summarize articles from RSS feeds and aggregator sites based on user interests.
- Worked on **Supabase** integration for user preference storage and assisted in setting up the **email delivery pipeline** via Postmark for automated newsletter dispatch.

SKILLS

Technical: C++, Python, TypeScript, JavaScript, SQL (PostgreSQL), HTML/CSS, React, Next.js, Node.js, FastAPI, Flask, REST APIs, Git, Supabase, Cloudflare R2, AWS, Google Cloud

ML & Data: scikit-learn, IsolationForest, pandas, NumPy, Matplotlib, Z-score normalization, unsupervised learning, feature engineering

Data Structures & Algorithms: 300+ problems solved; LeetCode rating 1400+; Pupil on Codeforces

Soft Skills: Leadership, Collaboration, Communication, Oration, Problem-Solving

CERTIFICATIONS

- [Artificial Intelligence: Constraint Satisfaction](#) – NPTEL (Top 1%)
- [Google Cloud Platform](#) – Google Cloud Engineering
- [Database and SQL](#) – Infosys Springboard
- [Networking Basics](#) – Cisco

ACHIEVEMENTS

- Winner, Fintech Track – Vibe-A-Thon 2026, NMIT;** built and presented GhosTrade, a real-time ML-powered market integrity engine, winning the Fintech track.
- Chair – IEEE GRSS, NMIT;** organized and led technical seminars, workshops and student initiatives.
- Winner – National Level Project Ideation Competition** (Road Safety), Mumbai (2019) hosted by Toyota.
